Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art does not teach a method/apparatus for controlling the dynamic braking of a DC motor in a tape transport device comprising a pulse width modulation device including a plurality of transition paths, each path having an initial state representative of a predetermined range of tape velocities, initial tape tension, and amount of tape in the reels of the transport device; a first input connected to a power-fail circuit; a second input for receiving a profile signal indicative of a present tape profile; and an output for generating a PWM signal which is used by the motor controller to control the dynamic braking of the motor, wherein the current produced by the motion of the motor is decrease by the PWM signal thereby creating a decelerating force while maintaining the initial tape tension.

Furthermore, the prior art does not teach a magnetic tape drive comprising a tape head; a first/second motors for transporting the tape; a control register receiving information on the tape profile, tape velocity, amounts of tape on the reels, and initial tape tension; a pwm device as the one described above, and an external interface for controlling the register.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
